

RoHS

RoHS Compliance Statement

The European Union Directive **2002/95/EC** restricts the use of certain hazardous substances in electrical and electronic equipment. This came into effect July 1, 2006. CodeJet Marking Solutions products are categorized as large-scale industrial tools, and as such are not covered by the Restriction of Hazardous Substances (RoHS) initiative. However, it is our intention to ensure that CodeJet and our suppliers comply with the directive wherever possible. Codejet has reduced voluntarily any RoHS substances that may be present in its products to levels below that of the directive.

Codejet Marking Solution's future products will be designed to fully comply with RoHS and any further directives that improve the environment in which we live and will do so without compromising product quality and performance.

In summary, although the RoHS initiative is not directly applicable to Codejet Marking Solution's, we will work to meet its requirements and surpass them over time while continuing to deliver the products our customers require.
